Project Name	Personalized Networking Assistant
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

1. CUSTOMER SEGMENT(S) [CS] • College students attending hackathons and career fairs • Job seekers preparing for interviews and networking events • Professionals attending conferences, seminars, and meetups • Entrepreneurs and startup founders	5. Available Solutions (Pros & Cons) [AS] Existing Solutions: Google Search, ChatGPT, LinkedIn articles, networking blogs. Pros: Easily available, general advice. Cons: Not personalized to the user's profile or event, no fact verification, no session history.	6. Customer Limitations [CL] • Limited networking experience • Lack of preparation time • Limited knowledge about event topics • Budget constraints for premium coaching • Mobile or laptop availability varies
---	--	--

2. PROBLEMS / PAINS + ITS FREQUENCY [PR] • Difficulty starting meaningful conversations (Very High) • Lack of confidence during networking events (High) • Limited knowledge about event topics or speakers (High) • Fear of awkward conversations (Medium) • Spending too much time preparing conversation topics (High)	9. Problem Root / Cause [RC] • Lack of personalized conversation guidance • Insufficient understanding of event context • Fear of making mistakes or sharing incorrect information • Limited networking skills and preparation	7. Behavior + Its Intensity [BE] • Searches online for conversation ideas (High) • Reads event information before attending (Medium) • Practices introductions (Medium) • Often avoids approaching new people due to lack of confidence (High)
3. TRIGGERS TO ACT [TR] • Receiving an invitation to a networking event • Preparing for a conference, seminar, or hackathon • Wanting to make professional connections • Need to improve networking confidence	10. Your Solution [SL] Personalized Networking Assistant uses DistilBERT to analyze event descriptions, GPT-2 to generate personalized conversation starters, and the Wikipedia API to verify facts. It also stores user profiles, networking sessions, conversation history, and system logs to improve future interactions and confidence.	8. Channels of Behavior [CH] Online: LinkedIn, Google Search, ChatGPT, Event websites, Company websites, Social media.
4. EMOTIONS BEFORE / AFTER [EM] Before: Nervous, anxious, unprepared, hesitant. After: Confident, prepared, relaxed, motivated, engaged.		Offline: Conferences, seminars, hackathons, workshops, career fairs, professional meetups.
